Declaration	
<p>I (the staff contact/coordinator) confirm I have read and fully understand the rules, and requirements set therein for the Schools micro-Gravity Rocket Experiment competition. I also confirm the participants in the competition have been made fully aware of the same.</p> <p>I confirm our 'in-house' sculpture development and entry selection process will be fairly and rigorously conducted.</p> <p>We acknowledge that the Dynamic Imaging Analytics Limited (DIA) judging panel's ultimate decision is final for the selection of participating sculptures. I.e. damaged and unsuitable sculptures will be withdrawn from the mission.</p> <p>We also acknowledge the complexity of space-flight and rocket science; things can go wrong. We therefore will not hold DIA, or any organisation or individual involved in the mission or the project, responsible for damage/loss of sculptures or non-provision of inflight video footage.</p>	
Signed (on behalf of the educational institution):
